

The MarketVector™ Cardano Benchmark Rate (ADABR) is designed to track the performance of a Cardano digital asset.

The graph displays the daily count of COVID-19 cases in the United States. The x-axis represents time from October 2019 to July 2020, with major ticks for Oct, Jan, Apr, and Jul. The y-axis represents the number of cases, ranging from 0.25 to 1.25 million. The data shows a period of low activity (around 0.25 million cases) from October to November 2019, followed by a rapid ascent to a peak of nearly 1.25 million cases in early January. After a period of fluctuation and a general downward trend, there is a significant spike in late April 2020, reaching approximately 0.8 million cases, followed by a decline and a slight uptick in July 2020.

Volume weighted median price average, based on 20 3-minute intervals.

Top 5 in CryptoCompare's Exchange Benchmark.
