# Coinbase Size Tilt Index

The Coinbase Size Tilt Index (COINTILT) tracks the performance of the market capitalization weighted basket of the largest and most liquid digital assets that fulfill the fundamental and market eligibility criteria. The component weightings are calculated based on their square root of market capitalization.

Key Features

Strategy

The objective of the Coinbase Size Tilt Index is to track the performance of the market capitalization-weighted basket of the largest and most liquid digital assets. The component weightings are calculated based on their square root of market capitalization.
