

COIN50 Daily Summary

The COIN50 index saw a daily return of 0.8%, with category returns ranging from 0.08% in store of value assets to a substantial 2.27% in media and entertainment tokens. The performance of decentralized finance tokens also stood out with a notable yield of 1.37%. In terms of trends, the 30-day return for the COIN50 index was remarkably strong at 28.37%, while the 90-day return was slightly more moderate at 2.9%. These figures demonstrate the generally positive momentum that has been seen in this digital asset basket over the mid-term period. The token AXS led the way, providing a return of 6.36%, whereas EOS lagged with a return of -5.16%. Additional tokens achieving substantive returns include MKR and BONK, yielding 5.60% and 3.53% respectively. "COIN50 index trends showing positive returns"

Key highlights:

1. Top Performer:

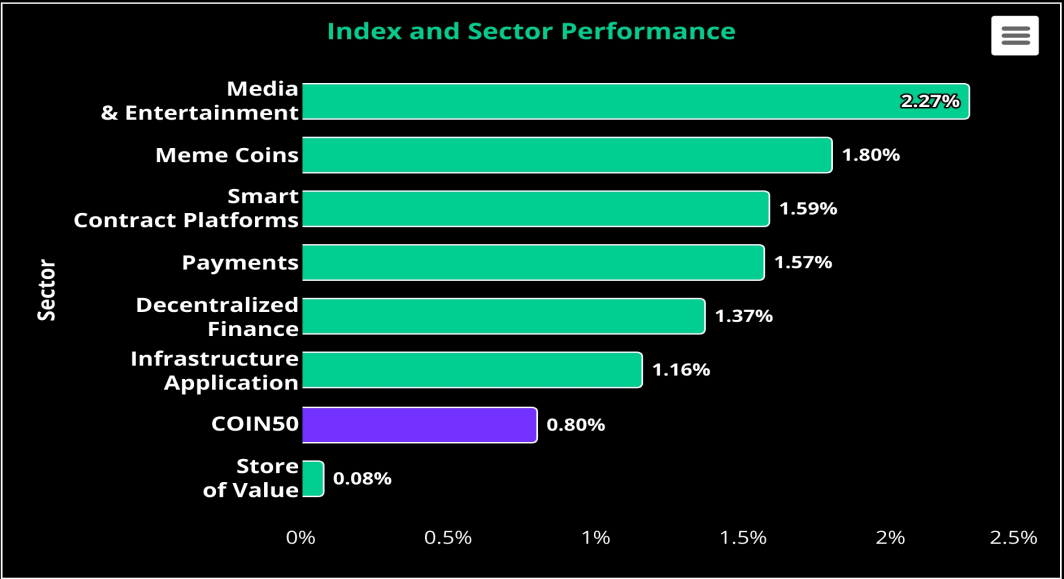

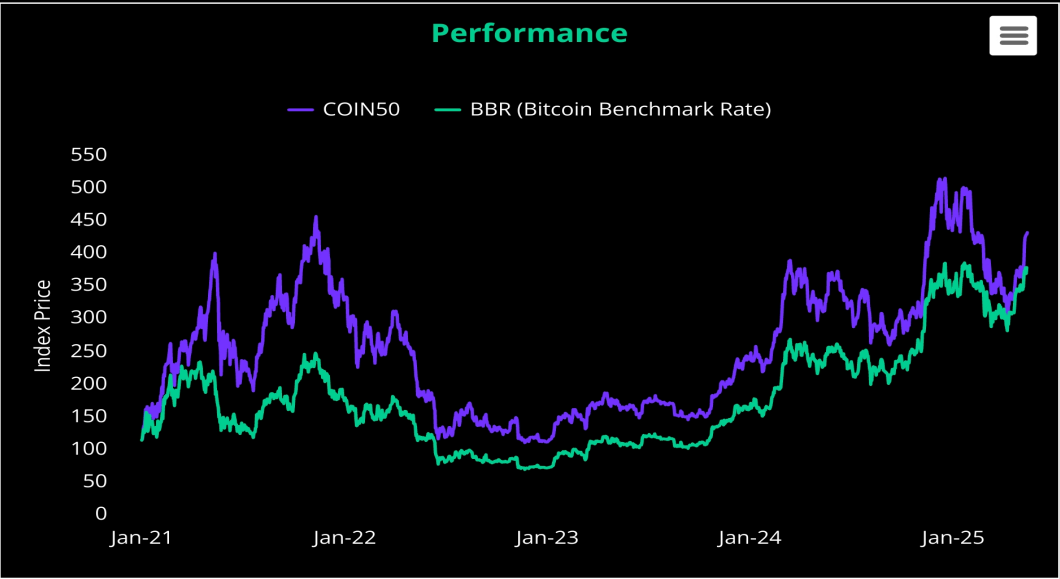

The AXS token emerged as the top performer, providing investors with a robust return of 6.36% in the monitoring period.

2. Largest Decline:

EOS exhibited the most significant decline among the 50 tokens, with a return of -5.16%.

3. Noteworthy Movements:

Tokens such as MKR and BONK stood out with solid returns of 5.60% and 3.53%, highlighting the upside opportunities available in the decentralized token market.

It is not possible to invest directly in an index. Exposure to an asset class represented by an index is available through investable instruments based on that index. MarketVector does not sponsor, endorse, sell, promote or manage any investment fund or other investment vehicle that is offered by third parties and that seeks to provide an investment return based on the performance of any index. MarketVector makes no assurance that investment products based on the index will accurately track index performance or provide positive investment returns. MarketVector is not an investment advisor, and it makes no representation regarding the advisability of investing in any such investment fund or other investment vehicle. A decision to invest in any such investment fund or other investment vehicle should not be made in reliance on any of the statements set forth in this document.

Investments into crypto currencies and/or digital assets are subject to material and high risk including the risk of total loss. The calculated prices may not be achieved by investors as the calculated price is based on prices from different trading platforms. Furthermore, an investment into crypto currencies and/or digital assets may become illiquid depending on the trading platform or investment product used for the specific investment. Investors should carefully review all risk factors disclosed by the relevant trading platform or in the product documents of relevant investment products.

Prospective investors are advised to make an investment in any such fund or other vehicle only after carefully considering the risks associated with investing in such funds, as detailed in an offering memorandum or similar document that is prepared by or on behalf of the issuer of the investment fund or other vehicle. Inclusion of a security within an index is not a recommendation by MarketVector to buy, sell, or hold such security, nor is it considered to be investment advice.

All information shown prior to the index launch date is simulated performance data created from backtesting ("Simulated past performance"). Simulated past performance is not actual but hypothetical performance based on the same or fundamentally the same methodology that was in effect when the index was launched. Simulated past performance may materially differ from the actual performance. Actual or simulated past performance is no guarantee for future results.
